## **ZOOM Presents a Broad Range Ring and Pinion Gear Line**

**January 2, 2008 (Mooresville, NC)** ...ZOOM Performance Products, the originator of the performance ring and pinion gear concept, has returned to the gear business and now offers a broad range of high quality ring and pinion gear sets for a wide variety of uses. ZOOM ring and pinion gear sets are available for replacement and high performance use for cars, light trucks, off road and racing.

Logging over forty years of producing quality gear sets has resulted in ring and pinions that feature the highest quality materials manufactured to proper specifications for each application. The ZOOM gear machining process, from the first operation to the final face hob, is precision controlled to ensure quiet

operation, easy set up and precision fit. Every ZOOM gear set is matched with a complete, high quality installation kit providing all of the supporting items required to swap a gear correctly. ZOOM installation kits feature high quality bearings, crush sleeves, ring gear bolts and gaskets to insure a long service life, proper fitment and quiet operation.

Since 1966, ZOOM Performance Products has been the leader in performance clutch and gear engineering and innovation for muscle cars, modern performance cars, racecars and diesel trucks. ZOOM is headquartered in a brand new R&D Center in Mooresville, NC, the heart of the automotive performance industry.
